

PRODUCT INFORMATION SHEET**ROV Dirty Work Pack HPU****DESCRIPTION**

This anti-contamination hydraulic power pack allows your ROV's clean hydraulic system to drive the tool skid's potentially dirty hydraulics with TOTAL ISOLATION OF THE TWO SYSTEMS, thus greatly reducing the risk of costly downtime and the need to replace damaged hydraulic components.

Bell housing is fitted with pressure compensator connection, drain & bleed plugs.

Connection to the pump is at the rear

Connection to the motor is at 90° to the motor and can be orientated to 0°, 90°, 180° & 270°

Variations to suit your requirements are always available.

The unit is manufactured by Lawson Engineers Ltd.

FEATURES

- Motor displacement: 19cc/rev
- Pump displacement: 14.4cc/rev
- Max. input flow: 57 lt./min.
- Max. input pressure: 210 bar
- Max.output flow: 38.5 lt./min.
- Max output pressure: 240 bar
- Weight: 31 Kg
