

Cable End Seal

DESCRIPTION

The cable end seal is a temporary storage solution for leaving cables on the sea bed for up to 6 months.

The solution is based on Bennex Boot Seal Technology.

Overall dimensions: Ø32x255mm (Ø42x300mm).

FEATURES

- Pressure tested to 350bar
- Cable diameter range: 12-35mm (other sizes available on request)
- Exposed materials: Stainless steel and natural rubber

Delivery includes:

- G.A. drawing with part list
- Certificate of Conformance
- Qualification testing against client specified cable upon request

Related equipment:

- Cable hang-off

Cable end seal available for both electrical and F.O. cables.
